

Дорогой Василий и Андрей мне пришла прозьба от Николая Жукова разместить на странице ЖМ официальное заявление для российских фанатов от IFBB PRO и WBBF Mr UNIVERSE Дайо Ауди об инсинуациях которые проводит ВФФ от его имени.

Dear Nikolaz,

I hope you are well. I also hope you are able to find a translator for the following statement I am about to give below.

I am very embarrassed that I have been dragged into a situation like this which will never have happened if I was given the right and truthful information about my invitation to Brusno.

I do not feel it is worth my time answering that man who has been posting all sorts of rubbish on the forums as he is under instructions from his superiors- therefore he has to do as he is told.

There is also no need for me to post anything on the WBBF/WFF site as this will only be removed by the administrators.

Hence I will write you a statement to clear the air and offer my explanation regarding my visit to Brusno. Please read below:

STATEMENT BY DAYO AUDI

I wish do declare that my final contest as a competitive bodybuilder was in November 2008 where I won the overall Mr Universe title at vilnius (lithuania).

This was the only title left for me to win, having the British, European and World titles with NABBA and a professional title with the IFBB.

Following the Universe win I announced my retirement from competition. The muscle magazines in the UK are fully aware of this as I conducted interviews with them.

Since 2008 I have not entered any competition or done any guest posing here in the UK or anywhere.

When therefore I was invited to Brusno I categorically confirm that IT WAS NOT TO COMPETE as I had retired.

I was told that I was invited as a guest and former champion and the idea of doing a guest spot was mentioned which I initially did not want to do.

It was then I was told that my fans were expecting me (which included Nevsky) and that he was going to be there, together with Lou ferrigno and possibly Silvester Stallone and the big German Gunter Schliercamp and that it was an opportunity not to be missed as they would be doing some filming for a short Hollywood film about bodybuilding.

I was also told that it would be a good opportunity for me to market both myself as well as my supplement company. It was at this point that the idea began to become attractive and I was convinced.

I was told that when I got to Brusno the entire programme will be made known to me and an air ticket will be sent to me.

On the day on the show I was picked up and taken to the venue and was briefed by the organiser of the event and told the programme. I was to go on stage and guest pose after which Nevsky would also do a guest pose. Then after this, myself and Nevsky would come on stage (and I quote)

"for a little show and comparison nothing serious, just for fun and to entertain the audience". At the end of this entertainment and to my surprise a number of trophies were handed out and we left the stage. Later on during the show I cornered the organiser and questioned why trophies were needed to be given out if it was just pure crowd entertainment and I was assured there was nothing serious about it, "just a bit of fun" !!!!

I asked about the promise of sylvester Stallone and Gunther and I was told they could not make it. Also none of the supplement distributors whom I was previously told would be at the show were around. At the party after the event I was again assured by the organiser that I should not read any meaning into the events of the morning and that it was just as he said "a bit of fun" for the audience.

I have to admit that to hear that this "bit of fun" has now been converted/changed to an "official" Universe contest is beyond belief.

I am very concerned that a development like this does not make the organisation look like a serious proposition. I have expressed my concerns about this to clear my conscience.

I have been in the iron game now for about 20 years and I am also a qualified judge, former champion and coach for upcoming bodybuilders.

Nevsky I wish the best of luck in pursuing his acting dream and ambitions for politics in Russia but he does not have the talent required to be a bodybuilder.

I would hope that this statement has cleared the air. All this would never have happened if the real reason for my invitation to Brusno was made to me.

At least I should have been given the option of knowing the truth from the start. Let us not diminish the Integrity of the Universe title, respected by so many or worst still , ignore the years of pain, sacrifice , and years of hard work that goes into creating a championship physique or winning a title of that distinction.

I would hope that this statement clears the air. You will have to work things out for yourself as to the reason/s why a guest appearance, done as a favour got upgraded to an "official" contest.

God bless us ALL

Dayo Audi.
